Skills

- **Languages & Frameworks:** Java, Node.js, TypeScript, JavaScript, React.js, Redux, HTML5, CSS3, C, C++, Shell Scripting
- **Backend & APIs:** REST, GraphQL (Subgraph & Supergraph), Apollo Federation, GraphOS, Microservices
- **Databases:** Oracle SQL, PL/SQL, MySQL
- **DevOps:** Git, GitHub, Unix/Linux, Bash Scripting, Automation
- **Other:** Agile, Backstage, API Design, Problem Solving

Certifications

Apollo Graph Developer - Associate Certification

Apollo Graph Developer - Professional Certification

Education

Savitribai Phule Pune University (SPPU) Pune, India

AUGUST 2015 - AUGUST 2019
Vishwakarma Institute of Information Technology
Bachelor of Engineering (Electronics and Telecommunication Engineering)

Kendriya Vidyalaya CME (CBSE) Pune, India

MARCH 2013 - MARCH 2015
Higher Secondary Education

Professional Work Experience

Tech Mahindra Ltd, Pune, India : *Software Engineer*

Jul 2021 - Present

- Managed mission-critical telecom backend systems (billing, CTDC, mediation), ensuring 99.9% uptime and smooth business operations.
- Automated production support processes, reducing incident turnaround time and manual interventions.
- Fixed complex backend logic bugs, optimized batch jobs, and maintained system stability for high-volume datasets.
- Handled full incident lifecycle (P1-P4), including root cause analysis, resolution, and stakeholder communication.
- Collaborated cross-functionally with DevOps, DBAs, QA, and business stakeholders for seamless delivery cycles.
- Technologies: Oracle SQL, PL/SQL, Unix Shell Scripting, HTML, Backend Automation, Batch Jobs, Monitoring Dashboards.

Entrepreneurial & Self-Initiated Projects

Sukoon Sagar Restaurant – Online Food Ordering System

- Identified operational inefficiencies for a local restaurant and proactively proposed a digital solution.
- Conducted direct stakeholder meetings to gather business requirements and deliver a fully functional ordering platform.
- Engineered and deployed the system using React.js and REST APIs, streamlining their entire order management process.
- Showcased ability to gather client requirements, build scalable solutions, and deliver production-ready applications independently.

Portfolio Website

- Designed and deployed a fully responsive portfolio to showcase personal projects, technical skill sets, and certifications.
